Socialising

Overview

The Ladybird Play Tower is a cost-effective choice for schools, nurseries and community playgrounds looking for high-quality outdoor play equipment without compromising on opportunities for active and social play. The single-tower design keeps the footprint manageable while still creating a proper destination for children. Once they reach the raised platform, several children can play together at the same time, making the Ladybird more than just a climbing route. The platform becomes a natural meeting point where children can talk, play, watch what is happening around them and enjoy the playground from a different height.
