Overview

The Woodpecker Play Tower from ESP is a twin-tower climbing structure built to deliver high-energy, imaginative play in busy public spaces and to keep delivering it season after season. Two pitched-roof towers sit side by side, linked by a rope bridge that gives younger climbers their first real test of balance and nerve. A timber staircase with handrails offers an easy, confidence-building route for less-adventurous children, while a vertical climbing ladder, an angled rope scramble net and a chain net wall give bolder users a genuine physical challenge

Install Specifications

Safety Surfacing Area:
41.2m²

Install Time (hrs):
24.7

Excavation volume:
0.63m³

Max Footing depth:
500mm

Concrete volume:
0.63m³

Total Weight:
345kg

Heaviest Part:
32kg

Install Options

Surface Mounting
Inground ✓
Free Standing
Available Flat Packed ✓

Materials & Warranty
