Socialising

Overview

The Little Woodpecker Play Tower is a compact twin-tower timber structure. Every element deck height, step rise, handrail position is designed to give children a structure they can master rather than one they have to be lifted onto, building confidence and independence. Sensory panels at deck level invite discovery and exploration extending play beyond the purely physical. Two pitched-roof towers sit side by side, linked by a connecting deck to create a small, contained world at height. The scale is deliberately modest: young children benefit from being able to see the whole structure at once, understand where the routes go, and stay within sight of supervising adults. It's a design that builds confidence rather than testing it.

Install Specifications

Safety Surfacing Area:
37.2m²

Install Time (hrs):
21

Excavation volume:
0.65m³

Max Footing depth:
500mm

Concrete volume:
0.65m³

Total Weight:
348kg

Heaviest Part:
16kg

Install Options

Surface Mounting
Inground ✓
Free Standing
Available Flat Packed ✓

Materials & Warranty

Laminate Timber (Redwood) - 20 Years
PAR Treated Timber (Redwood) - 20 Years
Stainless Steel - Lifetime
Galvanised Steel - Lifetime
HDPE - 10 Years
Ropes & Nets - 5 Years
HPL - 1 Years
