Socialising

Overview

The Badger Play Tower is a compact three-tower timber structure that delivers substantial play value from a modest footprint. Its balance of capacity, durability and specification-friendly design makes it a natural fit for housebuilder amenity spaces, school playgrounds and public open spaces alike. It supports physical development through climbing, stepping and descending; imaginative and role play within its sheltered, roofed tower spaces; and social play as children move between levels. The multi-tower arrangement means several children can play simultaneously without crowding an important consideration for residential schemes and school sites where peak-time demand is high.

Install Specifications

Safety Surfacing Area:
44.1m²

Install Time (hrs):
27.3

Excavation volume:
0.72m³

Max Footing depth:
500mm

Concrete volume:
0.72m³

Total Weight:
520kg

Heaviest Part:
32kg

Install Options

Surface Mounting
Inground ✓
Free Standing
Available Flat Packed ✓

Materials & Warranty
