Socialising

Overview

The Deer Play Tower is a wide-span, multi-tower timber structure built for the demands of a primary school playground. Its extended layout creates a full play journey from one end to the other, with enough capacity to keep large groups of children active, engaged and moving at break and lunchtime. The Deer supports physical, social, imaginative and cooperative play in a single structure. Bridges and traverses demand focus and body awareness; the width of the structure allows numerous children to play at once without bottlenecks; sheltered tower spaces invite role play, conversation and quieter retreat; and shared routes naturally encourage turn-taking, encouragement and negotiation between peers.

Install Specifications

Safety Surfacing Area:
65m²

Install Time (hrs):
32.4

Excavation volume:
0.86m³

Max Footing depth:
650mm

Concrete volume:
0.86m³

Total Weight:
498kg

Heaviest Part:
32kg

Install Options

Surface Mounting
Inground ✓
Free Standing
Available Flat Packed ✓

Materials & Warranty

Laminate Timber (Redwood) - 20 Years
PAR Treated Timber (Redwood) - 20 Years
Stainless Steel - Lifetime
Galvanised Steel - Lifetime
HDPE - 10 Years
Ropes & Nets - 5 Years
