Socialising

Overview

The Little Deer Play Tower is an expansive, low-level timber play structure designed for younger children - combining generous scale with age-appropriate challenge. Its extended linear layout spreads play across a wide footprint, encouraging children to journey between towers rather than compete for a single point of interest. The Little Deer supports physical development through climbing, balancing and traversing; imaginative play within its sheltered tower spaces; and social play as children follow each other along the route, take turns and play alongside one another. Its width means several children can play simultaneously without crowding a real advantage in busy nursery and infant settings.

Install Specifications

Safety Surfacing Area:
63m²

Install Time (hrs):
32

Excavation volume:
0.86m³

Max Footing depth:
650mm

Concrete volume:
0.86m³

Total Weight:
452kg

Heaviest Part:
23kg

Install Options

Surface Mounting
Inground ✓
Free Standing
Available Flat Packed ✓

Materials & Warranty

Laminate Timber (Redwood) - 20 Years
PAR Treated Timber (Redwood) - 20 Years
Stainless Steel - Lifetime
Galvanised Steel - Lifetime
HDPE - 10 Years
Ropes & Nets - 5 Years
HPL - 1 Years
Dibond - 1 Year
Robinia - 15 Years
Perspex - 1 Year
