Overview

The Brown Bear Play Tower is the flagship of the ESP timber tower range a multi-tower structure designed to serve large numbers of children simultaneously, with the capacity and variety to anchor an entire playground scheme. The Brown Bear supports physical, imaginative, social and cooperative play in a single structure. Net climbing develops grip strength, coordination and whole-body control; bridges and elevated decks build balance and spatial awareness; sheltered tower spaces invite role play and quiet retreat; and the scale of the structure naturally encourages children to negotiate, take turns and play together.
